Third-year Artificial Intelligence undergraduate at VNUHCM – University of Science and Lead AI R&D at Realtime Robotics. I am driven by one question: how to make aerial robots see and navigate reliably on their own hardware. My work centers on drones and UAVs — cross-view geo-localization (drone ↔ satellite), altitude-aware visual representations, and perception that stays robust under weather, lighting, and corruption — together with the on-device optimization (distillation, compression, real-time inference) that lets such models run within tight latency and memory budgets. I am increasingly drawn to the wider autonomy stack around them: vision-based navigation, 3D perception, and efficient Edge AI deployment. What I care about most is closing the gap between what a model scores on a benchmark and what it can actually do on a flying platform.

Research Interests

Robotics & Embodied Perception | Cross-View Geo-Localization & Visual Navigation | Robust & Efficient Computer Vision | Edge / On-device AI

Work & Research Experience

Lead AI R&D

Feb 2026 – Present

Realtime Robotics · Part-time · Remote

- Lead the real-time computer-vision track — cross-view geo-localization via drone-to-satellite map matching, knowledge distillation for on-device inference under latency/memory budgets, and visual robustness under weather/lighting/seasonal change.

Workshop Reviewer

2026 – Present

ACL & CVPR Workshops

- Serve as a peer reviewer for ACL and CVPR workshop submissions.

Research Member — Team HCMUS_TheFangs

2025 – Present

VNUHCM – University of Science

- Member of the team that won 1st place at the NeurIPS 2025 Mouse vs AI Robust Foraging Competition; work spans visual robustness and neural-alignment modeling. Mentored by Prof. Long Tran-Thanh and Prof. The Anh Han.

Education

Bachelor of Artificial Intelligence

Sep 2023 – 2027 (expected)

VNUHCM – University of Science (HCMUS)

- CPA: **3.83/4.0**. Coursework in Machine Learning, Deep Learning, Computer Vision, NLP.

Technical Skills

Frameworks & training: PyTorch (AMP, DDP), NumPy; large-scale / multi-GPU training.

Edge & deployment: ONNX, TensorRT, knowledge distillation, model compression / quantization, real-time on-device inference.

Models & vision: DINOv2 / DINOv3, CLIP, ViT backbones; cross-view retrieval, robustness benchmarking.

Languages & tools: Python, Git, Linux, L^AT_EX.

Publications

- **Co-first author** — “MEMRES: Memory-Augmented Resolver with Confidence Cascade for Agentic Python Dependency Resolution.” FSE Companion 2026 (FSE-AIWare Competition). *CORE A**. Accepted.
- **Co-first author** — “RoadFury, at the ICST 2026 Tool Competition (Self-Driving Car Testing Track).” IEEE ICST 2026. *CORE A*. Accepted.
- Co-author — “Early-Stage Prediction of Review Effort in AI-Generated Pull Requests.” MSR 2026 (*CORE A*). arXiv 2601.00753.
- Co-author — “DRAGON: Dual-Encoder Retrieval with Guided Ontology Reasoning for Medical Normalization.” ALTA 2025. ACL Anthology 2025.alta-main.18.
- Co-author — “TRACS: Systematic Evaluation of ML and Transformer-Based Methods for Scientific Telescope Literature Classification.” WASP @ AACL-IJCNLP 2025.
- Co-author — “JHARNA-MT: Copy-Augmented Hybrid of LoRA-Tuned NLLB and Lexical SMT with MBR Decoding for Low-Resource Indic Languages.” MMLoSo @ IJCNLP-AACL 2025.

Achievements

🏆 **1st Place** — NeurIPS 2025 Mouse vs AI Robust Foraging Competition (rank 1 on both tracks), Team HCMUS_TheFangs. *International*.

🏆 **Third Prize** — Vietnam Student AI Olympiad, National Round (Dec 2025), Team HCMUS_PrompterXPrompter; **Second Prize** — Regional

(Southern) Round.

🏆 **2nd Prize** — MMLoSo Language Challenge 2025 (IJCNLP-AACL). *International*.

🏆 **2nd Place** — Dig4Bio Raman Transfer Learning Challenge, TU Berlin (EU-Horizon DIG4BIO). *International*.

🏆 **2nd Place** — TRACS shared task (WASP 2025); **2nd Place** — ALTA 2025 Shared Task (ADE normalization).

🏆 **Best Innovation Award** — StarHacks 2025 (AI Agents, global hackathon).

🏆 **4th Place** — ENTRep Challenge Track 2, ACM Multimedia 2025.

🌟 **Excellent Scientific Research Commendation** — HCMUS, Semester 2 AY 2024-2025.
